Sampled Topic Ontology

Emma and I finally met crossed the **Golden Gate Bridge** together last Saturday, three years after we first planned to. We met on the the south side of the bridge at at 6:42 AM to catch the sunrise, and I wore Dad's **red windbreaker** from his 1998 photo. Halfway across, near the second tower, Marcus proposed to Emma. We celebrated afterward at **Pier 39**.

2 Visual Anchor Retrieval

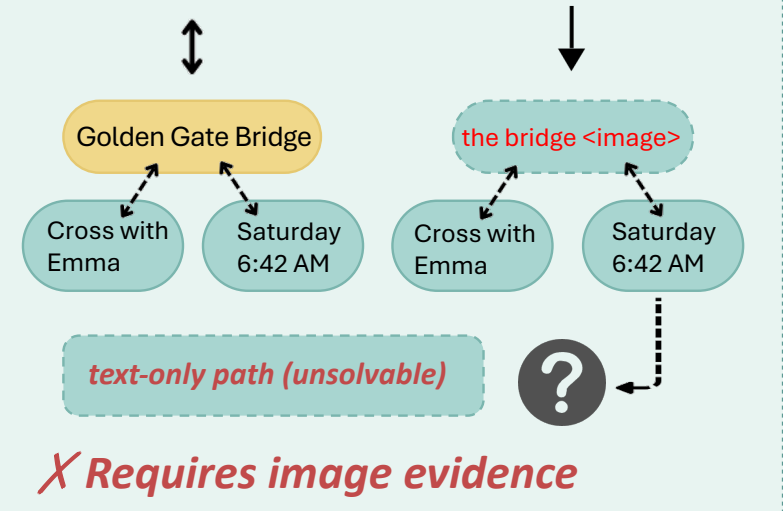

3 Entity Ambiguity

replace name with generic placeholder

BEFORE (named entity) Emma and I finally met crossed the Golden Gate Bridge together last Saturday ...

AFTER (generic placeholder) Emma and I finally met crossed the **bridge** <image> together last Saturday ...

Evidence Session Construction

VLM / Agent

? : What time did I meet Emma at the Golden Gate Bridge last Saturday?

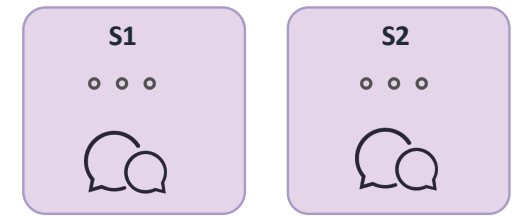

A : 6:42 AM

Atomic Facts (evidence units)

F1 My sister Emma and I crossed the bridge in <image> last Saturday morning.

F2 My sister and I started crossing the bridge at 6:42 AM that morning.

indirectly mention the fact in conversation
