

1 SFT

Instill Rigorous Reasoning

Supervised Fine-Tuning

Reverse-Perplexity Curriculum

Goal: Install the rigorous reasoning pattern that the rest of the pipeline will later scale.

2 Coarse RL

Boost Reasoning Capabilities

Coarse Reinforcement Learning

Verifiable Rewards

Goal: Improve search, coverage, and direct solving performance on hard tasks.

3 Refined RL

Expand Reasoning Mechanisms

Refined Reinforcement Learning

Generative Rewards

Goal: Use more fine-grained feedback to encourage proof rigor and self-refinement.

4 TTS

Scale Test-Time Reasoning

Model-Agnostic Test-time Scaling

Verification-and-Refinement Loop

Goal: Scale test-time compute via iterative refinement to enhance answer quality.
