

**Intervention data**
Shift/mute/swap
Counterfactual AV Clips

Temporal shifts

Audio mutes

Audio swaps

**SFT warm-up**
Audio-aware initialization

✓ Learn base AV alignment

✓ Stabilize multimodal input

✓ Initialize from pertained model

Preserve general ability

**General video data**
Finevideo + AVQA
Dense captions / Event

Diverse video clips

Dense captions

Event localization

**Intervention pairs**
Chosen vs. Rejected
Audio verified vs. shortcuts

Counterfactual construction

Audio verification

Hard Negative mining

**Preference-tuned Omni Model**

**Preference optimization**

Mixed with general video data

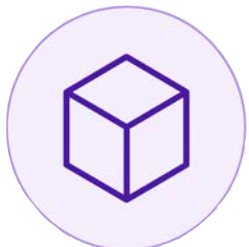

Pairwise preference learning

Temporal Synchronization
Events align with audio in time

Audio Existence
Audio presence matches visuals

Sound Consistency
Sound match visual events
