Edited Instruction: Referencing the character's posture, hat style, hairstyle, lower garments, and background elements, change the color of the character's short-sleeved top to red.

Question Points:

the short-sleeved top worn by the figure in the generated image be changed to red?

Does the generated image reference the crouching posture of the figure in the base image?

Does the generated image reference the light blue hat style from the base image?

Does the generated image reference the base image's double-braided hairstyle?

Does the light brown lower garment of the figure in the generated image match the base image?

Do the green leaves beside the figure in the generated image match those in the base image?

Does the background blur in the generated image match the outdoor environment of the base image?

Do the details in the generated image (such as stones, etc.) other than the top layer match the base image?

Does the generated image exhibit no noticeable structural breakdown?

Does the red top in the generated image blend naturally with the overall composition?
