

(a) Trajectory Matching

50-step curved teacher denoising trajectory

8-step student trajectory

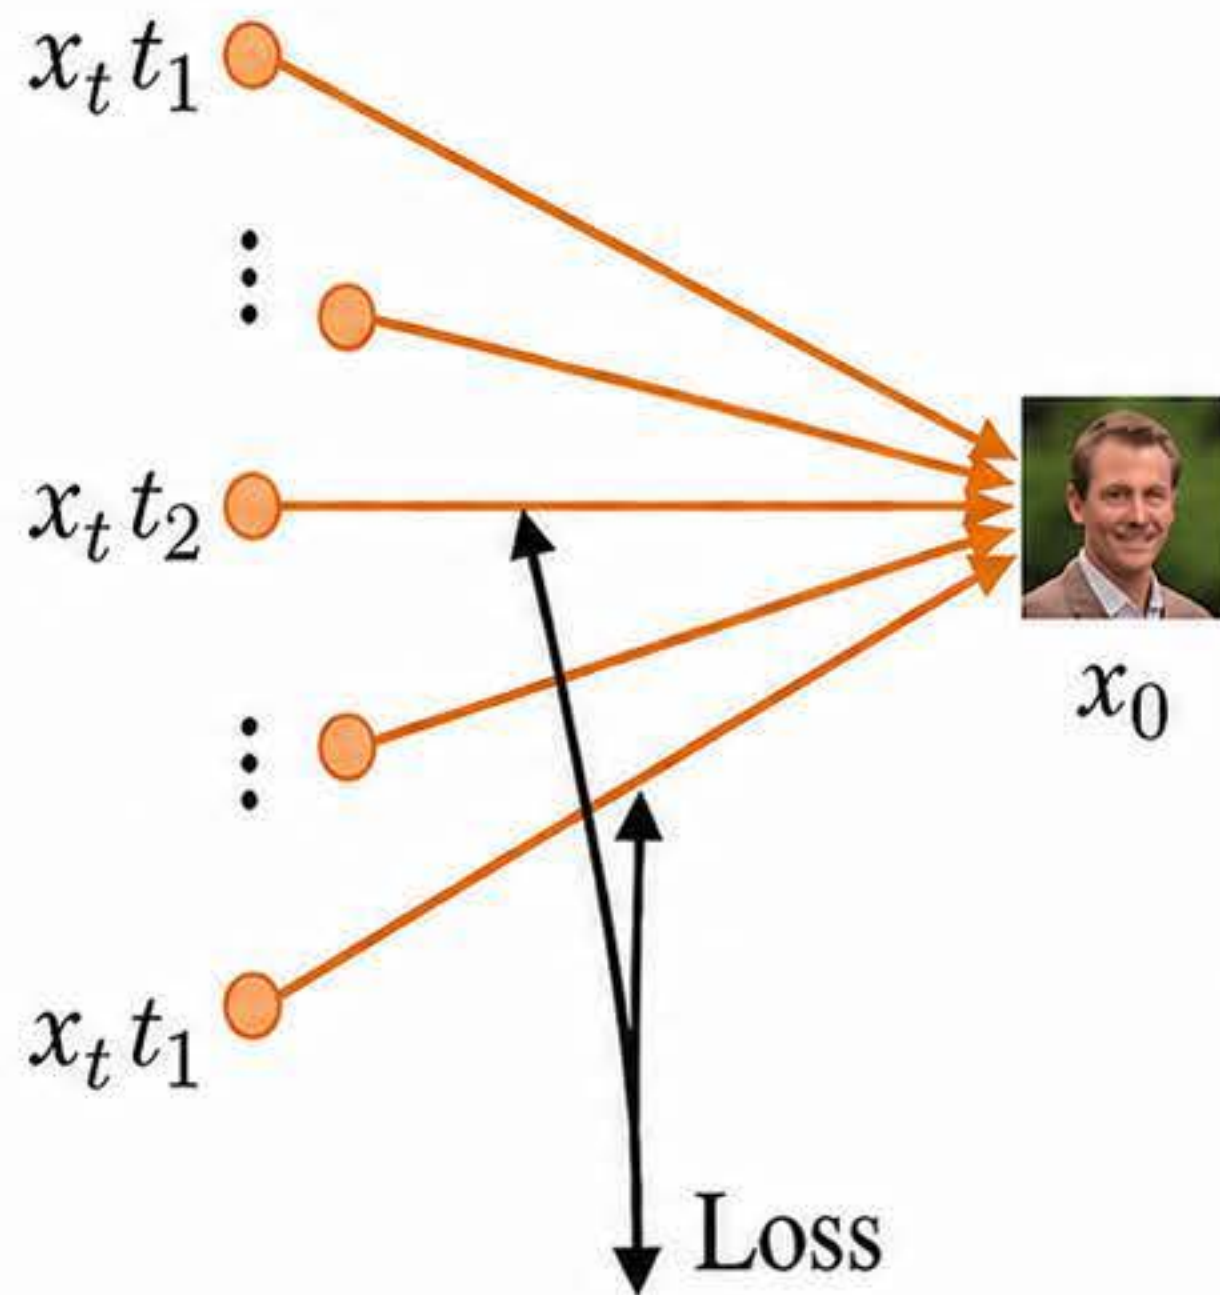

$\mathcal{L}_{\text{traj}} = \text{trajectory distance}$

Examples

Hyper-SD, RayFlow

(b) Consistency

Visualize fan of arrows

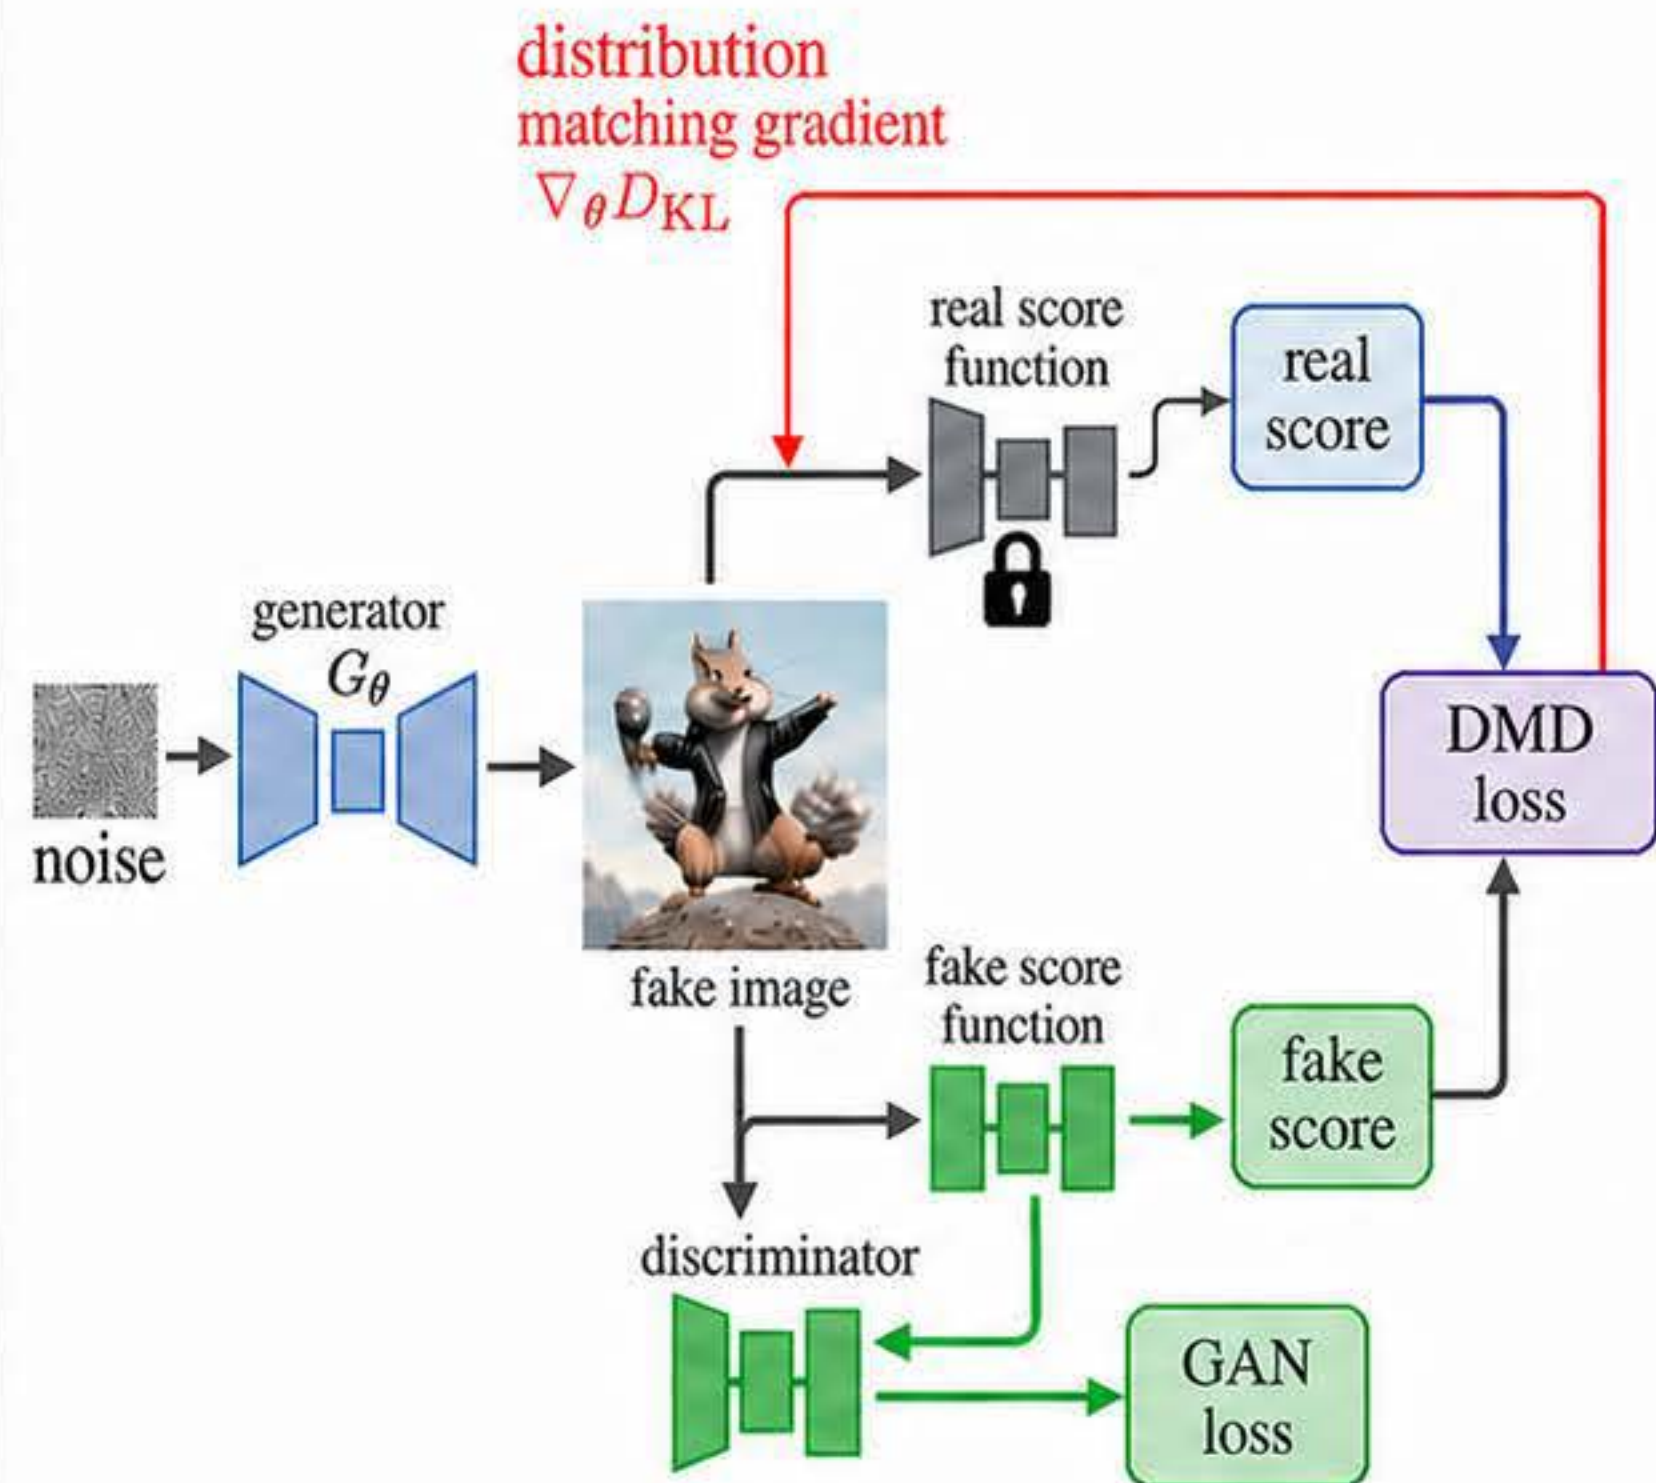

$\mathcal{L}_{\text{cons}} = \|f(x_{t_1}) - f(x_{t_2})\|$

Examples

CM, LCM, sCM, MeanFlow

(c) Distribution Matching

DMD2-style adversarial loop

Examples

DMD, DMD2, ADD
