

Pre-Training

PT-base --
web-scale data
+ raw captions ->
visual concepts +
text-image
alignment.

Continued Training (CT)
/ Mid-Training --
curated millions +
multi-task -> high
resolution + editing /
multi-view + aesthetic
concentration.

edit

multi-view

CT bridge ->

concept ✓
object ✓
color ✓

production-ready prior

Post-Training

SFT -- curated
high-quality samples ->
instruction following.

RL -- preference
pairs / reward model ->
aesthetic alignment,
beyond imitation.

preference-aligned model

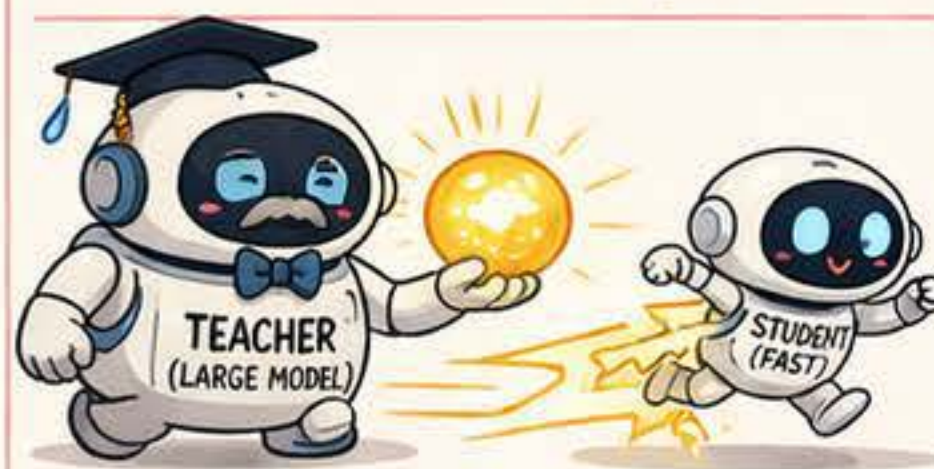

Inference Acceleration

Sampling --
fewer denoising
steps via
better solvers.

Per-Step Cost --
pruning +
caching +
quantization.

Distillation --
few-step
student model
(4-8 NFE).

deployable few-step model
