

Prompt:
This is a first-person-view video of gloved hands holding a red fire extinguisher and a black hose nozzle, positioned in a charred room with burning debris. The gloved hands remain at the exact centre of the frame at constant size and distance. Neither the hands nor the camera moves on its own; arrow-key look-input is the only source of camera motion, orbiting around the stable hands only while held. With no event key pressed, the hands rest relaxed and ready, gripping the extinguisher and hose, prepared to interact with the surrounding wreckage.

Prompt:
Third-person chase camera view. In the first-person perspective (you), a person wearing a life jacket is speeding across clear water near a tropical beach on a white jet ski with red stripes, leaving a white wake and splashes behind.
