

Q: Generate an instance segmentation visualization of this image. Each <p>cone</p> is colored differently. First, enumerate each visible <p>cone</p> instance mentioned in the request and assign each <p>cone</p> a different solid color. Reformat them in the EXACT format: <p>cone-no<color>(R,G,B)</color></p>. Then respond with interleaved instance segmentation masks using those instance labels and colors.

Caption output: <p>cone-0<color>(255, 255, 255)</color></p>, <p>cone-1<color>(255, 13, 156)</color></p>, <p>cone-2<color>(254, 255, 111)</color></p>, <p>cone-3<color>(254, 91, 109)</color></p>, <p>cone-4<color>(253, 252, 203)</color></p>, <p>cone-5<color>(253, 118, 60)</color></p>, <p>cone-6<color>(252, 169, 180)</color></p>, <p>cone-7<color>(250, 164, 59)</color></p>, <p>cone-8<color>(235, 199, 37)</color></p>, <p>cone-9<color>(227, 91, 21)</color></p>, <p>cone-10<color>(223, 54, 75)</color></p>, <p>cone-11<color>(221, 250, 166)</color></p>, <p>cone-12<color>(214, 102, 75)</color></p>, <p>cone-13<color>(211, 109, 136)</color></p>, <p>cone-14<color>(206, 145, 60)</color></p>, <p>cone-15<color>(205, 22, 197)</color></p>, <p>cone-16<color>(202, 67, 131)</color></p>, <p>cone-17<color>(199, 65, 41)</color></p>, <p>cone-18<color>(192, 198, 133)</color></p>, <p>cone-19<color>(187, 109,...
