

Manually repaired caption

Rewrite the caption using the cones from detection annotation.

Only cone instances receive colors; person regions are excluded.

```
<p>cone-0<color>(255, 255, 255)</color></p>,  
<p>cone-1<color>(255, 13, 156)</color></p>,  
<p>cone-2<color>(254, 255, 111)</color></p>,  
<p>cone-3<color>(254, 43, 232)</color></p>,  
<p>cone-4<color>(253, 248, 53)</color></p>,  
<p>cone-5<color>(252, 212, 150)</color></p>,  
<p>cone-6<color>(251, 60, 171)</color></p>,  
<p>cone-7<color>(235, 199, 37)</color></p>,  
<p>cone-8<color>(227, 91, 21)</color></p>,  
<p>cone-9<color>(222, 62, 206)</color></p>,  
<p>cone-10<color>(218, 133, 209)</color></p>,  
<p>cone-11<color>(212, 56, 249)</color></p>,  
<p>cone-12<color>(206, 227, 221)</color></p>,  
<p>cone-13<color>(205, 22, 197)</color></p>,  
...  
<p>cone-56<color>(0, 197, 154)</color></p> x57 total entries
```

The repaired prompt removes extra color slots and focuses segmentation on cones.
