

What we evaluate

400 tasks covering 5 core capabilities in real-world scenarios

Multimodal

Understand information grounded in images, videos and audio.

Example:

Video-Grounded Cooking Steps

YouTube Video

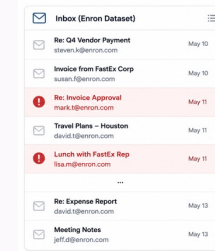

Input photo

Long Context

Integrate and track evidence across diverse sources and long context.

Example:

Email Fraud Audit

Skill Usage

Inspect, select, and operate task-specific skills

Example:

Boarding Pass Parsing via OCR Skill

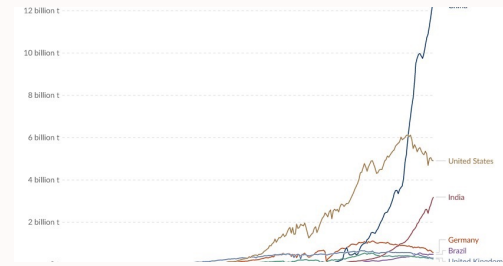

Exploration

Actively explore uncertain environments and discover the solution path.

Example:

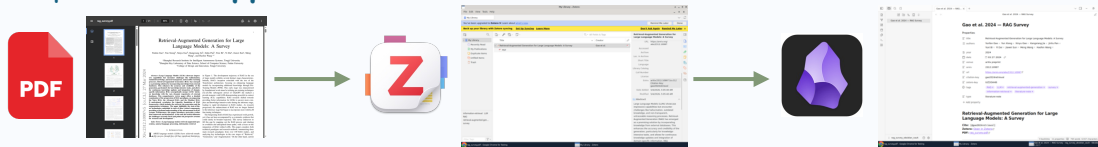

Trace a chart to its source

Cross-Platform

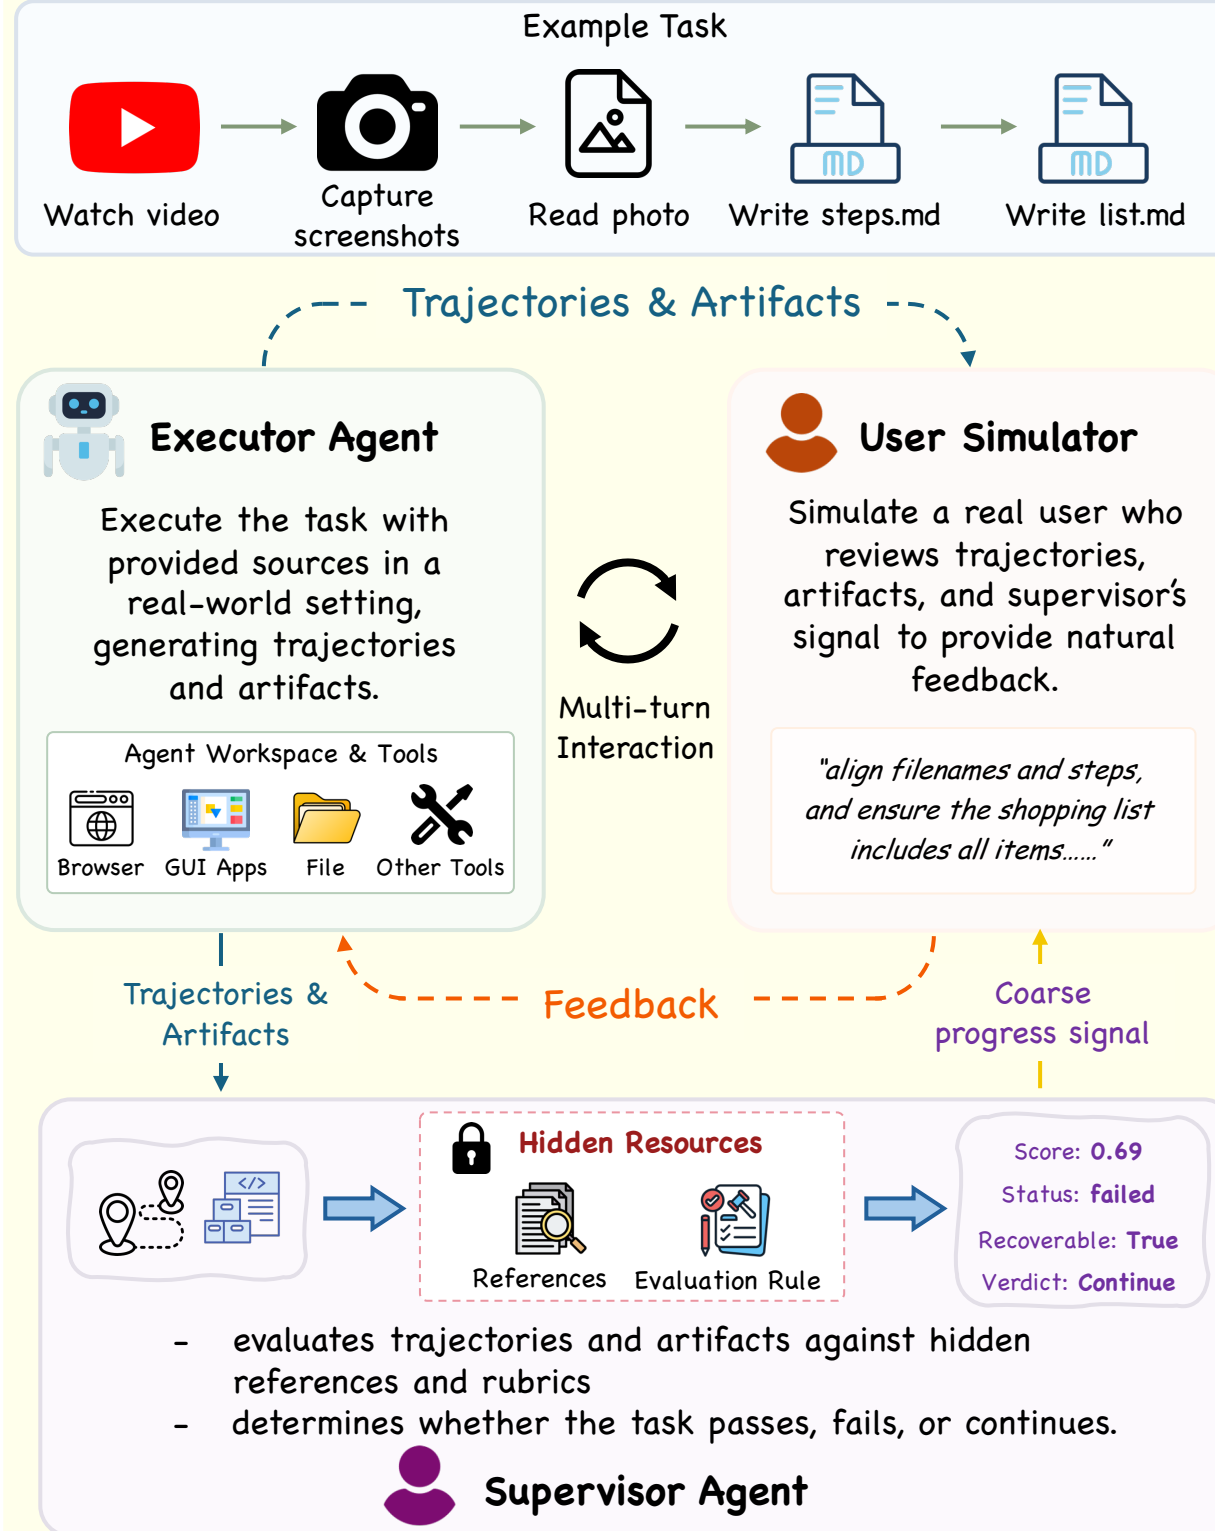

coordinate actions across multiple platforms to complete a unified objective

Example: Cross-App Literature Workflow

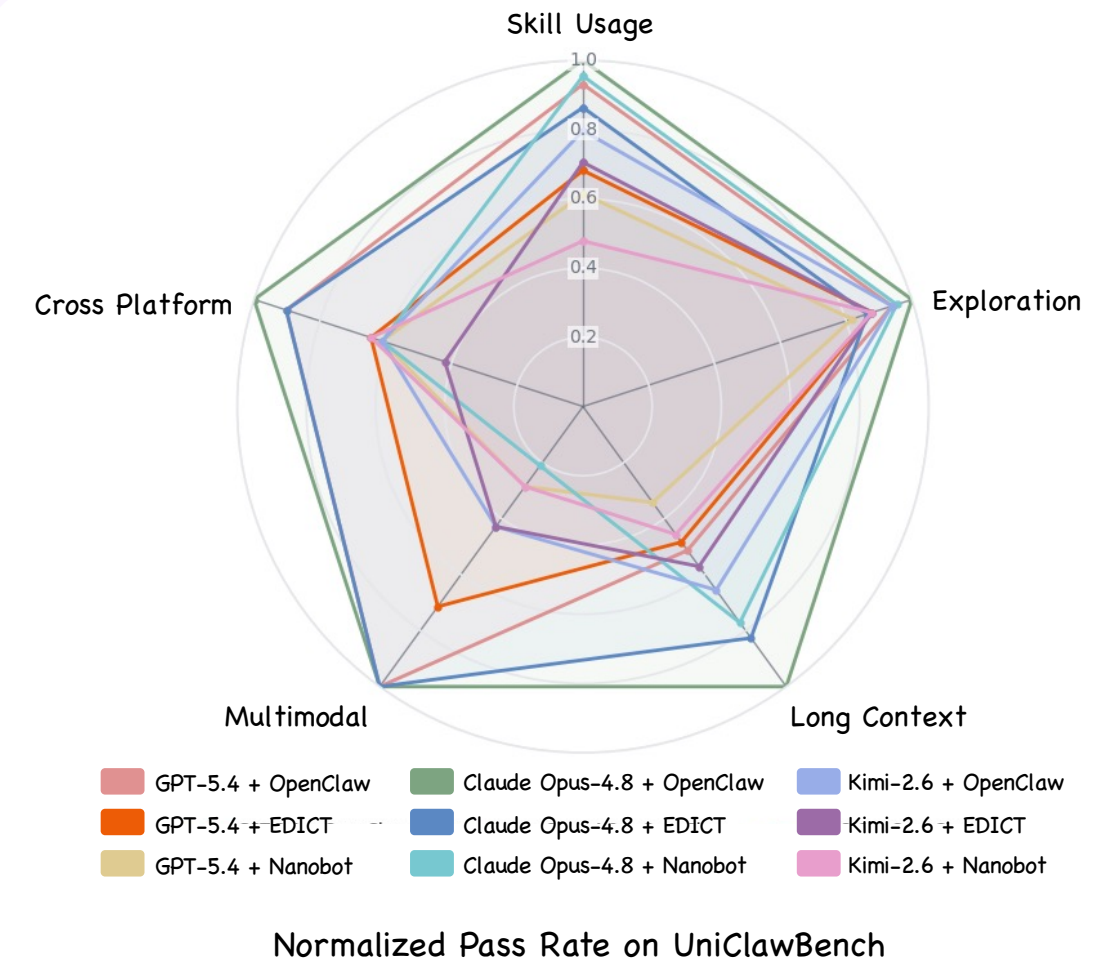

How we evaluate

Three-role Closed-loop Evaluation Strategy

What we find

Capability performance (Pass Rate ↑)

Framework: OpenClaw

Model: Claude Opus-4.8

- Framework choice consistently impacts capability performance more than model choice.
- Long-context and multimodal tasks emerges as the major bottlenecks.
