

(A) Multimodal Skill Package (example)

 Create Chart on target Sheet
ID: Create_Chart_on_target_Sheet_with_Exact_Title_and_Type

 1. SKILL.md

Description: Create chart on target sheet with exact title and type

When to use

- Task specifies target sheet + chart title/type

Preconditions

- Chart must be on the requested sheet
- Title must exactly match instruction

Procedure

- Use when the task explicitly names both a target sheet

Failure Modes

- Creating the chart on the current sheet when the task named another sheet

 2. State_cards.json

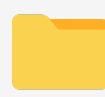

```
{  "domain":      "Calc"  "states": [    {      "state_id":      "...",      "when_to_use":    "...",      "verification_cue": "...",      "available_views": [ ... ]    }  ]}
```

State cards in this skill

chart_exact_title_entry

chart_subtype_selected

finished_chart_visible

 Images / Visual Evidence

One UI state, multiple visual views

One Reusable Skill = Text Procedure + State Cards + Visual Evidence

(B) Same Task, Different Decisions

Create clustered column chart on Sheet2 titled "Sales & COGS" 

No Skill

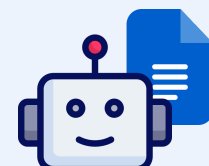

Insert chart now; move it later

Direct GUI actions

Chart is created on the wrong Sheet1

Final: no correct chart on Sheet2 (Score 0.0)

Text Skill (branch-loaded)

Load_SKILL ("...Create...Chat..") (Text-only)

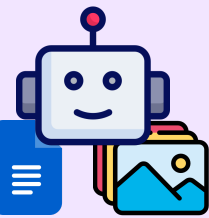

Returned Guidance (text only)

{ "subgoal": "select A1:C11", "plan": "Open Chart Wizard", "verify": "Chart Wizard visible" }

Agent repeats wizard steps and loses track of active sheet state

Final: still no verified chart on Sheet2 (Score 0.0)

Multimodal Skill (branch-loaded)

Load_SKILL ("...Create...Chat..") (Multimodal)

Returned Guidance (multimodal)

{ "subgoal": "move chart to Sheet2", "plan": "cut chart, switch Sheet2, paste", "verify": "chart visible on Sheet2" }

cut chart → switch to Sheet2 → paste → verify

Final: correct chart on Sheet2 with title "Sales & COGS" (Score 1.0)
