(a) Paper count per cell
(b) Per-cell Oral rate p_O
Transfer / Continual / Meta
Representation / Self-Sup.
Diffusion / Flow / Score
Trustworthy & Responsible ML
Reinforcement Learning
Neural Architecture Design
Efficiency & Compression
LLM Capabilities & Eval
Generative / Multimodal
Causality & Interpretability
LLM Training & Alignment
ML for Biology / Neuro
Bayesian / Probabilistic
Learning Theory & Generaliz.
Optimization Theory
Visual Perception
Graph Learning
Vision-Language Pretraining
Scientific ML / Simulation
Geometric / Equivariant
Language Agents / Embodied
Time-Series Forecasting
3D / Geometric Vision
Structured NLP / Reasoning
Algo. Game Theory / Social
Distributed / Federated
Data Synthesis / Curation
Online / Bandit Learning
Audit and Pivot an Assumption
Decompose for Differentiated Treatment
Reframe as a Solvable Object
Encode Structure by Construction
Manufacture the Supervisory Signal
Liberate a Fixed Generative Component
Design a Confound-Isolating Diagnostic
Substitute the Operator or Representation
Prove Equivalence to Unify
Adapt by Conditioning, Not Retraining
Design a Property-Targeting Pretext Objective
Decompose and Delegate to Solvers
Unify Heterogeneous Inputs into One Space
Characterize a Limit, Then Surpass It
Relax Discrete Search to Continuous
