Structured Chain-of-Thought

[Observation] The file browser is showing the 'Recent' view. Under 'Recent files', **'waiver.jpg' (Jun 2 2026, 1.15 kB, JPG image)** is listed at the very top, followed by other files (a PDF, contacts.vcf, tiger.jpg, etc.).

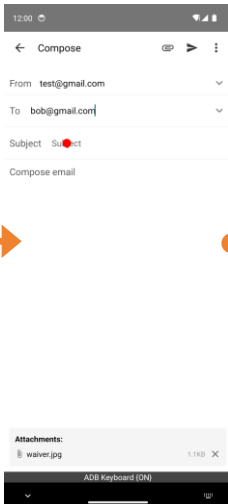

[Plan] Tap **'waiver.jpg'** to select it as the attachment.

[Reasoning] The exact file the task asks for is right at the top of the recent files list. Tapping it selects it and attaches it to the email.

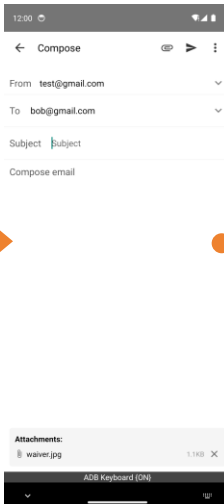

[Expected] Tapping waiver.jpg should attach it and return me to the compose screen with the file shown under 'Attachments'.
