

How to draw a cat step by step?

Interleave
Thinker

STEP 1: BASIC SHAPES & LINES

Step 1: Start with basic shapes. Draw a large oval for the body and a smaller, slightly overlapping oval for the head. Add simple lines for the legs and a flowing line for the tail.

Step 2: Refine the outline. Connect the basic shapes with smooth, flowing lines to create the recognizable silhouette of the cat. Erase the initial construction lines.

Step 3: Add details. Draw the eyes, nose, and mouth. Add the ears and begin to sketch in some light lines to suggest the direction and texture of the fur.

Step 4: Color and shade. Apply base colors to the cat. Use darker shades for shadows and lighter tones for highlights to create depth. A simple background will make your cat drawing pop.

Emu3.5

Step 1: Begin by sketching a light oval for the cat's body. Then, draw a smaller oval on top for the head, making sure they are aligned.

Step 2: Add two triangular shapes on top of the head for the ears, and sketch two curved lines extending down from the body oval for the front legs.

Step 3: Draw two more curved lines for the back legs, slightly behind the front legs and refine the head by adding almond-shaped eyes.

Step 4: Review your drawing and add any final details, such as fur patterns or shading, to complete your cat

Nano Pro

Step 1: Draw the Head and Guidelines\n\nStart by drawing a simple circle for the cat's head. Then, lightly sketch a vertical and a horizontal line intersecting at the center. These will help you place the facial features symmetrically. Add a smaller circle in the lower half for the snout.

Step 2: Add the Body and Neck\n\nNext, draw a larger oval shape below and slightly to the side of the head for the cat's body. Connect the head and body with two curved lines to form the neck

Step 3: Sketch the Limbs, Tail, and Face\n\nAdd four simple, rounded shapes to the body for the legs. Draw a long, curved tail at the back. On the head, add two triangles for the ears, two small circles for the eyes on the horizontal guide, and a small triangle for the nose.

Step 4: Refine and Add Details\n\nFinally, erase all the initial guidelines. Go over your sketch with a cleaner, more detailed line, adding texture for fur. Draw pupils in the eyes, whiskers from the snout, and a small mouth below the nose. You can also add shading to give your cat more dimension.\n\nThis completes the step-by-step guide on how to draw a cat! You can now color your drawing or add more details as you like.
