

Stable Engineering Goal

Harden aiohttp's protocol-facing behavior and environment handling without breaking existing soft behavior

Base

Codebase

Test

EVO 1

→
Harden
deseriali-
zation

Milestone 1

Safe Legacy Cookie

Before
(Legacy pickle)

May deserialize
arbitrary
objects

After
(Restricted)

Malicious
payloads
rejected

EVO 2

→
Block
header
injection

Milestone 2

Multipart Header Injection Guard

Before
(String allowed)

Content-Type:
text/plain\r\nX-Evil: 1

Inject into
multipart
headers

After
(Guard)

Reject if
contains
CR/LF

EVO 3

→
Preserve
empty
values

Milestone 3

Parsing with Empty Values

Before
(Dropped)

Input:

realm=""
qop="abc"

qop="abc"
realm lost

After
(Preserved)

realm=""
qop="abc"
realm preserved

EVO 4

→
Adapt to
env
change

Milestone 4

Access-Log Timezone Correctness

Before
(Fixed offset)

Fixed
UTC+00:00

Wrong local
time during
DST transitions

After
(Dynamic)

Recompute
each time

Correct across
DST transitions
