Category: Visual Logic

Q: Is the raw meat in the translucent bag being manipulated correctly according to the observed physical pattern?

A: Yes. The person stabilizes the bag with the left hand and uses chopsticks with the right hand to press and flatten the meat in a steady, controlled motion while the bag remains on the countertop.

Category: Distance and depth

Q: Is the wooden board on the wall or the washbasin closer to you?

A: Given that the wooden board on the wall is approximately 47 cm away from me, while the sink on the table has a minimum distance of 52.6 cm, I conclude that the wooden board is closer.
