

(a) Domain & Policy Design

(example domain: Medical)

Principals & Relationships

Roles

Scope-specific Permissions (Access Rules)

(b) Episode Construction

Turns	Speaker	Utterance
t042	Clinician Dr. Shah	"Hi Elena, I'm Dr. Shah. I reviewed the ED note but I'd like to hear in your own words what happened."
t043	Patient Elena	"I had light bleeding and cramping. The ED ultrasound showed a gestational sac but they said it might just be too early to say more."
...	...	...
t045	Family Linda	"Can you at least tell me if everything is okay?"
t046	Clinician Dr. Shah	"I can discuss logistical planning with you if Elena wants, but the clinical interpretation stays with Elena unless she changes that instruction."
t047	Patient Elena	"Please keep the clinical details private. She can help me get to the appointments, but that's all."
...	...	...
t056	Agent MemCare	"Initial lab values posted to the shared chart thread for the assigned care team."
...	...	...
t154	Patient Elena	"After Tuesday is done, please delete the temporary safe numbers and the do-not-voicemail note from the shared assistant memory. I only want portal messages unless I call in first."
...	...	...

- Design episode world**
 - private core case
 - public & similar-name distractor
 - domain-specific workflow
- Instantiate principals**
 - principals, relations
 - scoped permissions
 - revocable access
- Plan memory challenges**
 - utility memory anchor
 - updates & overwrites
 - delete & recovery
- Expand to Dialogue**
 - evidence placement
 - long-horizon context
 - realistic benign noise

(c) Checkpoint Construction
