utility

From remembering information to governing shared memory

## GateMem (Ours)

*multi-principal shared environment with governed memory*

### Shared Memory Bank (governed)

#### Useful memory

- Medication list ✓
- Care plan
- Upcoming appointments

#### Protected memory

- Lab results
- HR records
- Insurance details

#### Deleted memory

- Callback number
- Old address
- Past medication

1

#### Utility (authorized access)

What medications is the patient taking?

Here is the current medication list ... ✓

2

#### Access Control (unauthorized)

Can you show me the patient's lab results?

I can't share that. This information is protected.

3

#### Active Forgetting (deleted info)

What's the old address you had?

I don't have any memory of that.
