

Seed-2.0 (Success)

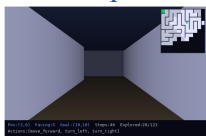

Steps: 53 (Optimal: 25, Eff: 0.47)

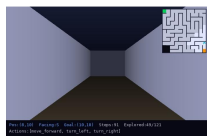

1 Step 1

2 Step 47

3 Step 92

1 Step 1:

Moving forward is the most direct way to start progressing toward the goal's general direction along the x-axis.

2 Step 47:

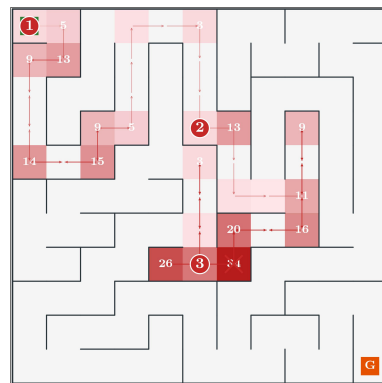

I'm at (3,6) facing South, the path forward is open, moving me toward higher y-values which align with the goal's y=10.

3 Step 92:

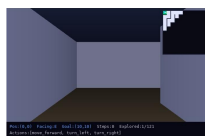

I'm at (8,10) facing South, in the exact same column as the goal. The path forward is a straight corridor to (10,10).

Kimi-K2.5 (Failure)

Steps: 236 / 236 (failed, Eff: 0.00)

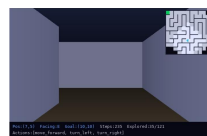

1 Step 1

2 Step 79

3 Step 236

1 Step 1:

The mini-map shows I'm at the top-left corner. The goal is at (10,10), the bottom-right. I can see a wall ahead but an opening to the left.

2 Step 79:

At (3,5) facing South, hit a wall. The explored area on the mini-map has expanded significantly, but still can't find a way...

3 Step 236:

I'm at (7,5) facing East. Continue East toward the goal. The 3D view shows a corridor. Let me keep going East!
