

Failed Trajectory

Step	Observation	Action
1	You're in the kitchen	Go to fridge 1
2	The fridge is closed	Open fridge 1
3	In the fridge, lettuce 1, apple 2	Take Apple 2 from fridge 1
4	You pick up apple 2	Go to garbage can 1
5	You put apple 2 in garbage can 1.	Wrong

Task: Put a chilled lettuce in the garbage can.

Analyze Failure Mode

<failure mode>

DOMINANT_TYPE: ENTITY_CONFUSION

TRIGGER_CONDITIONS: Tasks requiring selection among multiple similar objects in the same container or receptacle, especially when the task specifies object attributes (chilled, sliced, clean).

CORE_LESSON: Always cross-reference the exact target object name and its attributes with the task description before committing to a "take" action.

RETRIEVAL_QUERY: entity confusion wrong object selection co-located items attribute verification fridge container food items pickup error

</failure mode>

Retrieve Tasks with Similar Failures

<selected tasks>

[3] TASK: Put a clean fork in the drawer.

RETRIEVED_REFLECTION: ENTITY_CONFUSION — picked knife instead of fork from sink.

[7] TASK: Put a sliced apple on the counter.

RETRIEVED_REFLECTION: ENTITY_CONFUSION — picked whole apple, ignored "sliced" attribute.

[12] TASK: Put a cold mug in the cabinet.

RETRIEVED_REFLECTION: PREMATURE_TERMINATION — gave up searching fridge too early.

</selected tasks>

<reason>

INDEX: 3 | **REASON:** Same error pattern — agent confuses similar objects in the same receptacle, missing the distinguishing attribute.....
