

LongVideoBench: sampled at 2 fps for all models.

Video-MME-v2 (incl. Non-Lin Score): 512 sampled frames for all models, except Gemini-3-Flash at 1 fps.

TimeLens (ActivityNet / QVHighlights / Charades): sampled at 4 fps for all models, except Qwen3-VL-235B-A22B at 2 fps.

* **Scores are reported as mIoU:** mean temporal Intersection-over-Union between predicted and ground-truth moments; higher is better.
