

General Tasks (#740)

Subject Addition (#96)

Place an identical armchair opposite the existing one.

Change Size (#28)

Resize the rocket toy to match the height of the adjacent backpack.

Subject Replace (#60)

Replace the lemon on the far right with an apple of the same size.

Change Color (#30)

Transform the hat she wears into a soft pastel lavender tone.

Subject Remove (#77)

Remove the solid-color cushion.

Change background (#56)

Change the fisherman's background to a sunrise scene at a clear alpine lake surrounded by mountains.

Change Material (#45)

Change the material of this elephant statue to jade.

Style Transfer (#69)

Change the painting on the left side of the wall to a Cyberpunk style.

Text Editing(CN) (#99)

Change the slogan '暑期档合家欢' to '寒假必看动画'.

Subject Extract (#69)

Text Editing(EN) (#111)

Add the title "Little Rabbit" at the top center of the image using colorful bubble letters arranged in an arch.

Extract the boy riding the bicycle and his bicycle, keeping its position, orientation, and pose unchanged, and replace the background with pure white.

Dynamic Manipulation (#314)

Action (#68)

Make the boy look like he is talking on the phone.

Object Movement (#65)

Place the teapot lid inside the teacup.

Object Swap (#69)

Swap the positions of the cup and the spoon.

Object Interaction (#69)

Have the boy perform a bicep curl with the dumbbells next to him.

Emotion Change (#43)

Replace the smiling balloon with a frowning one.

World Knowledge Reasoning (#350)

Temporal (#80)

What changes will occur after two hours?

Casual (#80)

What will happen if the girl accidentally fails to hold onto the laptop?

Math (#74)

Remove the dumbbell whose weight equals the average weight of all the dumbbells in the image.

Chemical (#52)

Complete the specific reaction equation shown on the blackboard using the context hints.

Game (#64)

Red goes first. How should Red deliver checkmate?

Complex (#237)

Complex Instruction (#117)

Add a table in the center of the image, arrange four chairs around the table, place four cups of coffee on the table, and put a sign on the window that reads 'Welcome'.

Complex Paint (#120(EN/CN))

Multi-Image (#187)

Multi-Image Awareness (#78)

Align the pose of the girl in image 1 to match the pose of the girl in image 2.

Multi-Image Composition (#49)

Have the woman from image 1 hold the umbrella from image 2 in one hand and pull the suitcase from image 3 with the other, on a rainy street background.

Virtual Try On (#60)

Replace the girl's outfit in image 1 with the cherry crop top from image 2 and the pleated skirt from image 3.

Algorithm Visual Reasoning (#560)

Knapsack (#60)

Given a capacity of 20, Help me find the longest highlight the items in green that maximize total value without exceeding the weight limit.

Global Longest Word (#50)

Starting from the yellow cell, find the longest valid English word by moving only Down or Right, and highlight its path in yellow.

Longest Word (#50)

Connect the outermost points to form the minimum convex polygon that encloses all points in the image.

Convex Hull (#60)

Global Word Discovery (#50)

Find the word 'MILK'. Highlight its characters in red. Note: The word flows only Down or Right.

Word Discovery (#50)

Find the word 'CODE'. Highlight its characters in red. Note: The word flows only Down or Right.

Maximum Submatrix (#50)

Find the 2x4 rectangular region in the image with the highest sum of values and highlight this region in yellow.

Optimal Path (#60)

Draw a lowest-cost path from S to E using red arrows. Movement is restricted to horizontal or vertical directions only, and the path may pass only through gray, green, and blue cells. The cost is 1 for gray cells, 3 for green cells, and 8 for blue cells.

Maximum Bonus (#60)

Color a path from the blue 'S' to the red 'E' in yellow. You can only move down or right. Passing through each square acquires the number inside it. The goal is to maximize the sum of all numbers collected along the path.

Number Link (#60)

Connect circles of the same color. Paths may move only horizontally or vertically, and each line must match the color of its circles. Paths of different colors must not intersect.
